

ECMI Quality Product Lines

Energy Saving & Water Quality Products GUARANTEED to Provide Results

ECMI is proud to offer the complete lines of *Savastat, Hydropath, Stanlin, & HydroPRO* products. Our products have been used successfully for over ten years around the world. Look for client testimonials, energy saving details, and other company news on our website and at www.ecmi.us

The **ECMI** product lines include the following **PROVEN** products:

Savastat LC

Adds a new level of intelligence to Hot Water Heat loop system boilers*. Unit will save an average of 17% to 23% on annual boiler energy consumption! WE **GUARANTEE 15% SAVINGS** with this unit. Winner of the Heating Product of the Year Award in 1992 and 1995. **Over 35,000 units are in use today!**

* Compatible with non-modulating boiler control systems only. 15% Guarantee is for space-heat systems. Process systems carry guarantee for specific application.

Savastat HW

Programmable Control Unit for commercial Domestic Hot Water systems, typically will save at least 20% of energy consumption for electric or gas domestic hot water heating systems! **GUARANTEED 15% SAVINGS. Single control unit can manage up to 4 hot water heaters if they are in close proximity and feed the same hot water circuit** (with purchase of optional control modules).

HydroFLOW

C – Series

The HydroFLOW Scale Inhibitor is a revolutionary breakthrough in water treatment technology. Guaranteed to eliminate new scale build-up, and in most cases remove existing scale from building systems. HydroFLOW also helps prevent corrosion, and keeps equipment operating at maximum efficiency 100% of the time. For use with water supply systems, heat exchangers, hot water heating systems, etc. **Over 500,000 installations of various Hydropath products worldwide, with a 100% success rate.**

AquaKLEAR

P – Series

Hydropath units for commercial swimming pools and spas. P-Series units are also used for Cooling Tower, pond, & fountain applications. Reduces chemical use by up to 90% and backwashing by up to 75%! Reduces and controls bacteria and algae growth, promotes release of free chlorine, and provides crystal clear natural smelling water. **Guaranteed results, extraordinary savings! A MUST for commercial pool owners!**

SteamKLEAR

S – Series

Specifically designed to eliminate lime scale formations in **steam applications** such as steam boilers/generators, steam humidifiers, restaurant steamers, saunas, etc. Also eliminates the need for annual service and maintenance agreements to chemically remove scale from these type systems.

Huge savings potential!
