

Feasibility Study Agreement

Agreement Between _____ a company licensed and registered to conduct business in the State of _____ (hereafter referred to as Company), and _____ (hereafter referred to as Client).

Company is acting in representation of ECMI and/or Stanlin Energy Group as an authorized agent as part of an Alliance Agreement between these parties to offer various energy saving devices and technologies, either in part or as an overall "system," where the opportunities arise which are anticipated to be of benefit to the Client.

This agreement authorizes Company to perform a Facility Audit which may include fluid systems analysis, energy consumption analysis, draft, combustion, and thermal efficiency tests and analyses on any furnaces, hot water heaters, or boilers, and energy analysis regarding chillers, HVAC, and/or industrial processing related equipment located at:

(If more than one facility, please include separate sheets identifying the properties)

Client Responsibilities

For Company to determine if there are applications whereby implementing any of the represented technologies may provide a reasonable expectation that fuel consumption will be reduced, or improvements in water quality, air quality or treatment procedures may exist, CLIENT agrees to provide Company with copies of its monthly fuel and water bills for named facilities for the previous thirty-six (36) months as well as any other data that may affect space and hot water heating, energy or water consumption, and/or chemical treatments employed in treating the affected systems of Audit. Such information will be provided in a timely manner.

Primary Scope of Audit and Feasibility Study

If the scope of the Audit and Feasibility Study are to include **only** specific systems/technologies being offered by Company at this time, please detail partial scope of audit:

Fluid Systems _____
Boiler/DHW Controls _____
Draft Controls _____

Company agrees to hold all information gathered from client as confidential, regardless if such information is deemed proprietary, confidential or public information. Company will use gathered information strictly for purposes of determining where the various technologies being offered by Company can or may improve process operations, lower energy consumption, reduce emissions, improve water quality, or reduce costs associated with various operational parameters of Client.

Feasibility Study Agreement - Page 2

Conclusion of Feasibility Study and Proposal

Upon conclusion of the Feasibility Study and Audit conducted by Company, Company will present to Client a documented Proposal detailing the methods available for Company to provide benefit to Client, for review by Client. Proposal may include but is not restricted to projecting anticipated cost reductions, detailing potential enhancement of processing procedures, opportunities to provide benefit regarding compliance related issues, and options regarding water treatment and/or chemical handling benefits which said technologies are expected to provide.

Project Acceptance and Timeframe

Because project costs for materials and installation may be time-sensitive, Client will be allowed up to 14 days to determine if it will proceed with implementation of Proposal in its entirety, or to proceed with specific Project segments as detailed. Should Client not make a decision regarding proceeding with Project, in part or in whole, within the 14 day allotted timeframe, Client can request re-submittal of Proposal by Company to indicate any changes of costs associated and related to completion of Project.

Liability and Indemnity

Liability and indemnity are controlled by the marketing agreements between Company and Dealer (or Retailer) as more fully detailed in Marketing Agreement. Client shall bear no responsibility for any liability (although none is expected) from any testing of the subject equipment.

This agreement is accepted by:

Representative of: _____

Name: _____ Title: _____

Facility Address: _____

Phone Number: _____

I express that I have proper Authority to enter into this agreement with Company:

Authorized Signature _____ Date: _____

Dealer Information: (ECMI/Stanlin Energy Group Authorized Dealer/Representative)

Company Name: _____ Phone number: _____

Company Address _____

Agent: _____ Date: _____
