

SteamKLEAR is ideal for restaurants, hospitals, labs, universities, prisons, stadiums, and various food service industries.

SteamKLEAR SIGNIFICANTLY REDUCES MAINTENANCE FREQUENCIES, NEED FOR EQUIPMENT SERVICING, AND THE ASSOCIATED OPERATING COSTS.

It's a fact of nature that water contains minerals. Inside steam equipment, these minerals can build up and create a number of problems including:

- Increased energy use
- Clogged drain valves
- Slower and uneven cooking cycles
- Reduced steam flow
- Increased equipment downtime
- Higher service and repair costs
- More frequent service & maintenance

SteamKLEAR S-38

THE ANSWER TO LIME-SCALE PROBLEMS IN ASSOCIATION WITH SMALL STEAM EQUIPMENT

S-38 PROVIDES EFFECTIVE TREATMENT OF HARD TO REMOVE SCALE IN WATER SYSTEMS OF ANY TYPE OR SIZE. UNITS ARE AVAILABLE FOR ANY SIZE INDUSTRIAL, COMMERCIAL, OR DOMESTIC APPLICATION.

S-38 GENERATES A POWERFUL CONDITIONING EFFECT OVER LONG DISTANCES OF PIPE NETWORKS, WITHOUT WATER HAVING TO FLOW PAST THE SIGNAL GENERATOR ITSELF.

S-38 IS A MAJOR BREAKTHROUGH IN ELECTRONIC WATER TREATMENT TECHNOLOGY. IT IS A UNIQUE, PATENTED, TECHNOLOGY WITH A 100% SUCCESS RATE.

S-38 UNITS ARE EASILY INSTALLED IN MINUTES, REQUIRING NO CHANGES TO PLUMBING, AND ONLY A STANDARD ELECTRICAL OUTLET FOR POWER.

How do you control problems with lime-scale in your facility?

What are your underlying costs for:

- Maintenance
- Equipment cleaning
- Filter replacement
- Chemicals
- Loss of efficiency

The economical answer to your lime-scale problems associated with:

- Steam equipment
- Dishwashers
- Ice machines

PRODUCTS COME WITH:

- A 3 YEAR GUARANTEE
- FIT FOR PURPOSE WARRANTY

Lime-scale is a common problem in ice machines. The various dissolved solids tend to concentrate in the water & precipitate on freezing surfaces. The ice sticks to the scale & jams the machine. The best way to solve the problem & reduce service calls is to prevent scale formation. HydroFLOW prevents scale and slime, and the ice produced becomes perfectly clear.
