

ATTENTION CAR WASH PROFESSIONALS!

We offer Spot-Free treatment solutions uniquely suited for the Car Wash Industry. If your business is facing problems with hard water and the resulting effects of spotting, scaling, and unnecessary high costs of chemical usage, **we offer viable & cost-effective solutions.**

HydroPath Technology will be of particular interest to businesses located in areas where water discharge regulations are becoming increasingly more stringent, and the use of water softeners are being restricted or banned. HydroPath Technology is a completely **chemical-free** and **maintenance-free** solution, providing a cost effective method of dealing with hard water problems. Fast pay-backs of under 12 months are often achieved. Thousands of these units are currently being used in car wash applications all across Europe! **We are now bringing this PROVEN technology to the United States.**

HydroFLOW-C Series Water Conditioners

HydroFLOW “C” Series

The HydroFLOW C Series units are designed for effective scale control and **spot-free** water conditioning for feed water systems. These units will effectively eliminate limescale from within system components, and also eliminate limescale from forming on spray nozzles.

Detergent and automotive finish chemical usage can be reduced as if a water softener were being used, without the negative side effects of salt precipitation and spotting after dry-out. The scale forming particles are simply washed out with the flow, and are easily blown or wiped away during final dry-off. HydroFLOW Units are recommended **ONLY** for use in full service car wash applications since “dust” will occur if not properly dried.

AquaKLEAR "P" Series

The AquaKLEAR-P Series units are designed specifically for water conditioning in recirculation and filtering system applications. The P units will effectively provide a continuous flocculation effect to assist the filtering process. Use of chemical flocculants can often be eliminated. Filter back-washing and maintenance cycles can be significantly reduced.

Why use expensive and maintenance intensive technologies when HydroFLOW can do the job at a fraction of the cost?

Over 500,000 global installations with 100% Success!

AquaKLEAR-P Series Water Conditioners

We also provide solutions to reduce the high costs of water & space heating!
